

BROOKFIELD INSIDER

E-News letter for the month of June 2023

EDITORIAL BOARD

"Holistic development nurtures the mind, body, and soul, creating a harmonious symphony that empowers individuals to thrive in all aspects of life."

With a firm belief in the importance of nurturing both the physical and mental well-being of young minds, **Brookfield International School** has consistently demonstrated its commitment to providing a comprehensive education experience.

At our school, the integration of physical and mental wellness is ingrained in every aspect of the school's curriculum and routine. From the youngest learners in pre-nursery to the seniors in grade XII, students are encouraged to actively participate in a wide range of activities that promote their overall well-being. By fostering a nurturing environment that addresses the physical and mental aspects of development, the school ensures that students not only excel academically but also grow into well-rounded individuals ready to face the challenges of the world.

BFIS serves as a shining example of how educational institutions can make a profound impact on the lives of their students by prioritizing holistic development. We applaud their efforts and look forward to witnessing the continued success of their students in the times to come.

GROW WITH THE FLOW

Seva Activity

Father's Day

International Yoga Day

Professional development Workshops

SEVA ACTIVITY

Have you ever really looked at trees
And see their perfect beauty?
If you have, you know that their protection
It is a stern and sacred duty.
Protection of that spreading grandness;
Through many summers, grown.
Safeguarding those temples green
Where the song of the bird is known.

The biggest current problem is climate change, mainly by the harmful effects of **Carbon Dioxide**. Trees help in the absorption of **Carbon Dioxide**, removing it from the air and are our main survival tools. Healthy, strong trees act as carbon sinks, offset carbon and reduce the effects of climate change. What better seva would be there than planting trees, as reforestation is the answer to climate change? One of the tasks given to the students was to plant tree saplings like **Neem, Amla, Guava** etc, during their summer vacations. Many participated in this seva activity and contributed their bit as investors in the environment.

SEVA ACTIVITY

FATHER'S DAY ACTIVITY

A Dad is a person who is loving and kind
And often, he knows what you have in your mind
He's someone who listens, suggests and defends
A dad can be one of your very best friends.

Our little ones had a fun-filled **Father's Day** as they made beautiful things out of waste, along with their fathers, for the Best Out Of Waste activity. This special activity was assigned to the kindergarten kids during the summer break to honour the special bond with their dads.

FATHER'S DAY ACTIVITY

INTERNATIONAL YOGA DAY

Yoga is the journey of the self, through the self, to the self

The bustling pace of our children's life can have a profound effect on their innate joy and yoga helps to counter these pressures. **Yoga** at an early age encourages self-esteem and body awareness with a physical activity fostering cooperation and compassion. It enhances their flexibility, strength coordination and body awareness. The physical movements introduce kids to **yoga's** true meaning: union, expression and honour for oneself and one's part in the delicate web of life. This **International Yoga Day** our little ones participated in the **Yoga competition** and posted proudly their pics of doing yoga asanas. The theme for this year's **International Yoga Day** was **Har Aangan Yog.**

INTERNATIONAL YOGA DAY

FROM THE TEACHER'S PEN

"Play gives children a chance to practice what they are learning." -Fred Rogers

Children experience and learn about their world through play. They explore their physical environment, express their emotions and build their vocabulary through playful moments.

ANJALI GUPTA
TEACHER (BFIS)

Children develop their cognitive skills in **kindergarten** through activities like counting and sorting. They enhance physical abilities through art and outdoor play. Social and emotional skills are nurtured through interaction and empathy lessons. Language and literacy progress through storytelling and reading. Creativity is encouraged through art and imagination, and moral values are taught. We at **BFIS** help our toddlers to develop their every domain with the help of different hands-on activities.

PROFESSIONAL DEVELOPMENT WORKSHOPS

In learning, you will teach and in teaching, you will learn.

Teachers are the central part of the educational system and have a massive impact on student performance and achievement. A great teacher can guide a student through their studies and help them to develop and grow, not only in specific subject matters but also in learning crucial life lessons, communicative skills and confidence. In order for a teacher to provide this for their students effectively they themselves have to develop better or more up-to-date proficiency skills, master subject knowledge and understand the many different types of learners who could potentially be in one classroom. At **BFIS**, our fraternity should have the best professional development courses available.

The training sessions are needed to help the teachers learn or create new teaching strategies for all their students, which will bring back and sustain their interest in the classrooms and encourage effective learning. Classroom management and Discipline, identifying and dealing with Dyslexic students, Development of critical thinking skills, storytelling and art integration were some of the topics that were covered in the week-long workshops at the school. Teacher training addresses challenges that teachers may face within the classroom and gives the teachers the skills or training required to overcome these.
