

BROOKFIELD INSIDER

E-Newsletter for the Month of SEPTEMBER 2023

SEPTEMBER 2023

FROM THE EDITORIAL BOARD

Dear Parents and Students,

Greetings from Brookfield International School!!!

Each day is an opportunity to expand the horizons, explore the passions, and cultivate the skills that will shape the future. Children, you must embrace every lesson, challenge, and friendship that comes along the way, for these experiences will mould you all into the leaders and thinkers of tomorrow. Hence, it is rightly said that- "Every dream you dream, every goal you set, and every adventure you embark upon begins with a single step. Embrace each step with curiosity, courage, and a heart full of wonder, for within you lies the power to turn dreams into reality."

Parents, your encouragement, guidance, and partnership in your child's education are instrumental in their success. Together, we form a strong foundation for our students to build their dreams. Let's carry the inspiration forward, serving as a powerful reminder that each day presents us with unique opportunities to learn, grow, and make a meaningful, positive impact on our world.

As we reflect on the past month's vibrant activities and remarkable accomplishments, September has undeniably proven to be a dynamic and enriching period at BFIS. It's with great enthusiasm that we bring to you some highlights of the memorable moments that unfolded during the time.

With heartfelt gratitude and warmest regards,

Ms. PARAMJOT, Ms. PRIYANKA KAUSHAL & Ms. SAKSHI GERA

TEACHERS' DAY

A good teacher can inspire, ignite the imagination and instil a love of learning.

5th September is all about paying gratitude to our mentors and acknowledging their profound influence on our lives.

To honour their educators, the senior students and the management of BFIS held a grand ceremony on **Teacher's Day** with great enthusiasm and ardency. A medley of colourful performances marked the event.

The programme started with the welcoming of teachers by showering of petals and lighting of the lamp. The students presented a series of cultural items, and later, titles were given to all the teachers. It was followed by a cake-cutting ceremony and a sumptuous lunch.

JANMASHTAMI

Celebration @ BFIS

On **6th September, Wednesday**, our little ones came all dressed up as **Kanhas and Radhas** to celebrate **Janmashtami**, heralding the birth of **Lord Krishna**, the beloved of millions, with great zeal.

Students danced to the various Krishna songs and turned the campus into Vrindavan. **Director of BFIS Ms. Neelam Singla**, and **President Mr, Manav Singla** graced the occasion with their presence. After the aarti ritual, our little laddoo Gopals and Radhas danced and sang bhajans.

It's our duty to introduce our kids to our traditions and customs so that they have strong roots embedded in their proud identity. Kindergarten kids also indulged in craft work of making cute little makhan matkis and flutes.

GRANDPARENTS DAY

Card Making Activity

From early in the morning,
 Until I go to sleep each day
 I know my grandparents love me
 In a very special way.
 Sometimes, it's tea and crackers,
 Sometimes, a walk in the park,
 Sometimes, it's just a hug
 When I'm scared and in the dark
 I love to hear their stories about the past and
 where they're from,
 And I know their hearts are filled for me,
 With never-ending love.

Grandparents teach values as they are the natural transmitters of values, children learn values such as perseverance, loyalty, hard work, patience sacrifice from their interactions with their grandparents' presence and love around them. To appreciate the unconditional love showered by grandparents, our little munchkins created beautiful handmade cards for them.

HINDI RECITATION COMPETITION

We use language to communicate with others, to establish relationships and a sense of self, and to express who we are; it is an integral part of being human. A native language connects us to a part of our identity that can't be replaced.

Hindi is our Official language. Hindi is the fourth most spoken language after Mandarin, Spanish, and English. It's written in the Devanagari script, which existed in the 11th century.

On **14th September**, the kindergarten wing organised a Hindi recitation competition to celebrate the Hindi Diwas. Kids came prepared with 'Hindi Kavita' and beautiful props depicting the poems. Our panel of judges were mesmerized by the performances of our little ones. Hindi Diwas is a celebration of the Hindi language and a recognition of India's linguistic diversity and unity. It serves as a reminder of the historical and cultural importance of Hindi in the Indian context, underlining its role as a unifying force in a nation with numerous languages and dialects.

EXPERIMENT DAY

One of the most effective and efficient methods of teaching kids is by experiments. **Science** is a subject that we experience in our daily lives. Making kids learn through science experiments helps them retain the reasons behind such happening for longer. The experiment activities easily help kids improve their thinking and reasoning abilities and activate creative thinking. Science and nature activities help the kids to understand better the environment they live in.

It helps the kids to develop analytical thinking, problem-solving, and coping skills, and it is important to develop kids' creativity. It was experiment day on Friday 22nd September for our KG kids under the 'Landforms' theme and they were super excited to see the orange lava coming out of the volcano. Nursery children experimented to see the things that sink and float in the water.

WORLD TOURISM DAY

On the day of **World Tourism Day**, our kindergarten kids were taken on a virtual tour around the world, making them familiar with the important tourist spots. Children who travel more have a vast experience in terms of cultures, languages, food, and increased tolerance and respectfulness towards others.

Besides, they have a willingness to learn and try new things. Our munchkins were also sensitized about being respectful and helpful to the tourists coming to our country and were told about the concept of 'Atithi Devo Bhava' along with taking care of the cleanliness of wherever we go as tourists.

RESULT DAY (TERM 1)

Every child is a unique piece of art,
every child has a beautiful heart ;
waiting to create his own unique space.
Don't try to dictate or force him to race
at a pace, he cannot ;
Let him be in his place
Just aid him to untie the knots
That keeps him from blossoming
In his chosen path.

It is time for the first term to end and to see what all our little ones have gained and their progress in all these past months. Assessments are over, and we were ready to share the reports with the parents of our kindergarten kids on the PTM on Saturday, 30th September. Every child is gifted. They unwrap their packages at different times.

Our duty as parents and mentors is to assist them, guide them and make them practise to keep on blossoming. We at BFIS believe that a bit of progress each day adds up to big results. Parents also donated stuff for the joy of Giving Week.

FROM THE TEACHER'S PEN

Children learn more from what you are than what you teach. By- W.E.B Du Bois.

Learning is a lifelong process that lasts from the womb to the tomb. In this process, the formation of the Heart and the development of a person's personality takes place. In changing times, our intention is to mould our students into responsible adults with a clear vision, motivation, faith and love for humanity.

As we impart education to match the advancement in technology and globalization, we march our students ahead with moral values, hard work and success with sincerity with a holistic approach. We get what we focus on, so let us focus on the good things that we would want for our children.
